

National Consortium of Interpreter Education Centers

## **DeafBlind Interpreting Module**

### **Simulated Sighted Guide Activity**

Have students pair up.

One student puts in the earplugs and puts on the vision simulation goggles.

The other student acts as his/her guide.

The students should perform the following before returning to the classroom to switch roles and repeat:

- Go up stairs
- Go down stairs
- Go to the restroom
- Go through a door that opens towards them
- Go through a door that opens away from them
- Navigate through a crowded area (You can arrange your room for this purpose if there is no other option close by.)

When all of the students have finished this activity, lead a discussion of their experiences.
